

FROSTED & DECORATIVE WINDOW FILM

ALPINETINT

Add privacy or give your interior the wow factor with frosted or decorative window films.

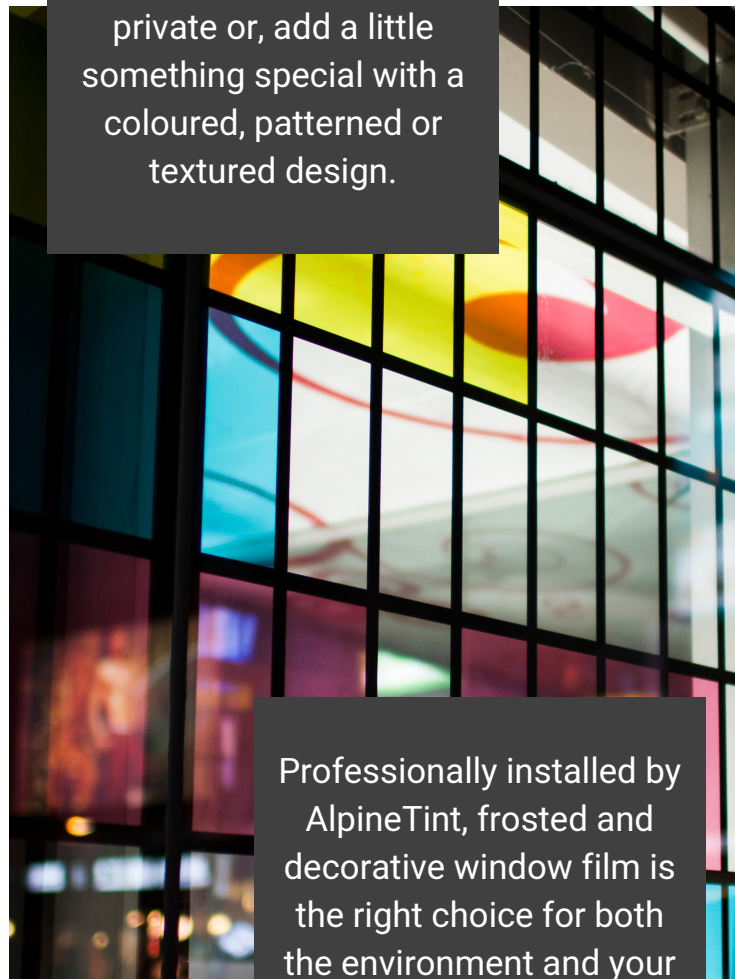

Give your windows a make-over, for a fresh look or for privacy. This range of window films are the ideal choice for updating your the look of your space or creating the right amount of privacy for your windows. Maintain your natural light from room to room, while ensuring people can't see in.

The effects of etched, sandblasted and textured glass can now be replicated easily, to achieve that great blend elegance, functionality and durability.

In situations where you might have gone for glass etching we have patterned films that will turn the eye, adding depth and perspective to your area. Couple this with the added benefit of a UV protection window film, you can reduce those harmful UV rays by up to 99%. Creating stylish spaces that blend privacy with aesthetics is now simple and easy.

Looking for more dramatic affects? Dichroic is a flexible polyester glass finish that can be applied onto any glass surface to create special effects by way of colour shifting. This affect gives the impression of the window changing colour when viewed at various angles. Scratch resistant, this product is both durable and visually appealing.

Transform your existing glass into something more private or, add a little something special with a coloured, patterned or textured design.

Professionally installed by AlpineTint, frosted and decorative window film is the right choice for both the environment and your budget.

Cost Effective

Generally cheaper than blinds or curtains

Custom Design

Want to do something really special? Our frosted films can all be printed on.
